

## **XClinical End-To-End workshop – May 6th, 2010**

Dear Madam, Dear Sir,

In recent years, using Electronic Data Capture (EDC) systems rather than paper-based data collection systems has become more and more common. The life cycle of data management hasn't changed, yet the ways of collecting data have. Data standards have gained importance, as have the software solutions to permit an End-To-End process within the Clinical Trial workflow.

### **EDC End-To-End**

From eCRF set-up to submission and archival  
May 6th, Mercure Hotel City Center, Munich, Germany

The workshop will contain a theoretical introduction to the EDC process and the related data standards (CDISC). This will be followed by live demonstrations which illustrate the End-To-End-process from eCRF set-up to Data Collection and Data Cleaning and finally to Data Submission and Archiving.

If you would like an invitation for this workshop please send an Email to Katharina Lang [kl@xclinical.com](mailto:kl@xclinical.com) including your contacts.
