

PRESS RELEASE – 20 April 2010

XClinical active contributor to CDISC Interchange Europe

XClinical actively contributes to CDISC Interchange Europe in London

XClinical GmbH, Munich, Germany – 20 April 2010 – Today XClinical, a European vendor of innovative software products for eClinical trials, announced its participation in the CDISC Interchange Europe taking place in London from 26-30 April.

XClinical's experts will be available during the exhibition at booth #9 for detailed discussions on CDISC-based tools for the eClinical process on the company's system MARVIN. XClinical is also participating in several training sessions, seminars and discussions.

On Monday the 26th, Dr. Philippe Verplancke will be holding a one-day course on ODM implementation. This class addresses the technical framework for ODM and offers an in-depth understanding of the model structure, an overview of XSL and other tools for working with XML, and strategies for implementing ODM within an organisation.

In the first seminar on Thursday the 29th ("ODM – More than meets the eye"), Dr Claus Lindenau will be presenting the topic "Production use of transactional ODM for data, metadata and audit trail archiving". Following this, Dr Verplancke will lead a session called "eProtocol – Yes we can do it", which will explore the value and use of the new CDISC protocol representation model.

A new element at the CDISC Interchange are the round-table discussions set to be held for the first time during this year's CDISC event. In the afternoon of Wednesday the 28th Dr Verplancke will hold a round-table discussion which will gather the questions, requirements and feedback revolving around the ODM standard from the CDISC user community. "Such round-table discussions are initiated by the E3C to

improve the steer communication between the CDISC organisation and professional users from the industry”, said Dr Verplancke. “Because I’m both a member of the E3C and the industry, I really do appreciate this opportunity to provide direct feedback to the CDISC organisation.”
