

PRESS RELEASE – February 18, 2008

**XClinical's EDC System MARVIN Selected by Oncology Services Europe**

*The Munich based CRO signs an ASP contract and three work orders for the use of MARVIN, one of the few EDC systems providing Double Data Entry.*

XCLINICAL GMBH, Munich, Germany – Feb 18, 2008 – XClinical, a European vendor of innovative software products for eClinical trials, today announced that Oncology Services Europe (OSE), a full service CRO specialized in oncological clinical trials, has selected MARVIN as its enterprise-wide EDC solution.

OSE, who was trained on MARVIN last year, has recently signed an ASP contract and will start using the software solution in three large clinical trials which involve more than 480 sites in up to 20 countries immediately. “After a careful evaluation of the EDC market we identified MARVIN as the best solution to address our two major requirements. First, the ease of use: after a comprehensive training we are now capable to set up studies by ourselves. Second, MARVIN’s special feature to combine EDC (*Electronic Data Capture*) and DDE (*Double Data Entry*) which is especially important in oncological clinical trials. XClinical’s cutting-edge EDC system MARVIN will further enhance our great services in clinical research”, stated OSE’s CEO, Dr. Wolfgang Beier.

“We are extremely pleased that Oncology Services Europe has selected MARVIN as its enterprise-wide EDC solution. OSE’s strategic decision to choose MARVIN as its EDC standard is further proof of our industry leading technology. The use of MARVIN has been growing very fast over the past years, reflecting the versatility and scalability of our product,” said Dr. Claus Lindenau, Head of Business Development at XClinical.

## **About XClinical**

XClinical GmbH ([www.xclinical.com](http://www.xclinical.com)), an innovative EDC-CDM system vendor based in Munich, Paris and Boston, USA, provides solutions for the electronic conduct of all types of clinical trials, post-marketing studies and registries.

XClinical develops and markets MARVIN, a CDISC ODM certified online platform for Electronic Data Capture (EDC), Clinical Data Management (CDM) and Clinical Trial Management (CTM). To date, MARVIN has been used to collect and process data from more than 50,000 patients in 50+ studies.

## **About OSE Oncology Services Europe**

OSE Oncology Services Europe S.a.r.l. is a full service CRO specialized in clinical trials in oncology. The company conducts all types of clinical studies from Phase I to Phase IV via Post Marketing Surveys (PMS) to non-industrial, Investigator Initiated Studies (IIT).
