

PRESS RELEASE – March 5, 2008

XClinical Invites to a Comprehensive EDC Workshop in Switzerland

The Munich based EDC vendor, the Basel based data management experts Hands-on and BIOP AG will show and discuss an optimal eClinical workflow.

XCLINICAL GMBH, Munich, Germany – March 5, 2008 – XClinical, a European vendor of innovative software products for eClinical trials, today announced a one-day comprehensive workshop titled “EDC – Fast, Easy and Reliable, from eCRF set-up to submission and archiving” scheduled to held on April 16, 2008 in Basel, Switzerland.

The workshop which uniquely involves a mix of Life Science companies will lead the participants through an optimal EDC (Electronic Data Capture) workflow, highlighting the benefits of modern eClinical tools. The course will address the key concerns around EDC implementation to gain maximum insight and knowledge of effective EDC implementation procedures. Hands-on’s data management experts will support the workshop with their great expertise in clinical research. XClinical’s CEO, Dr. Philippe Verplancke, who has been actively involved in the adoption of CDISC standards for years, will discuss the need of standardized clinical data by introducing the CDISC standard models. The view of programmers and statisticians regarding EDC will be illuminated by experts of BIOP AG, a Swiss based CRO providing data management, programming and statistical services. Derek Brandt, CEO Sensile Medical AG, Switzerland, will present a lecture addressing the areas critical to the success of clinical trials with regard to EDC.

Our Exhibition Schedule:

- DIA Barcelona, Spain, March 3-5, Booth 128
- DIA Washington, USA, March 16-19, Booth 605

About XClinical

XClinical GmbH (www.xclinical.com), an innovative EDC-CDM system vendor based in Munich, Paris and Boston, USA, provides solutions for the electronic conduct of all types of clinical trials, post-marketing studies and registries.

XClinical develops and markets MARVIN, a CDISC ODM certified online platform for Electronic Data Capture (EDC), Clinical Data Management (CDM) and Clinical Trial Management (CTM). To date, MARVIN has been used to collect and process data from more than 50,000 patients in 50+ studies.
